TITLE: POLYETHERPOLYOL HAVING STEREOREGULARITY AND METHOD OF PREPARING THE SAME

PRELIMINARY AMENDMENT

Commissioner for Patents
P. O. Box 1450
Alexandria, VA 22313-1450

Sir:

In conjunction with the filing of the present application, and prior to an initial Official Action on this matter, please amend the above-identified application as follows:

Preliminary Amendment: SPECIFICATION AMENDMENTS

In Paragraph [0014], please amend the paragraph as follows:

The above and other objects, features and other advantages of the present invention will be more clearly understood from the following detailed description taken in conjunction with the accompanying drawing, ~~in which:~~

In Paragraph [0015], please amend the paragraph as follows:

FIG. 1 is a graphic illustration of a C-NMR spectrum showing two peaks of methylene carbon at 72 and 73 ppm.

Preliminary Amendment: ABSTRACT AMENDMENTS

On page 21, please amend the Abstract as follows:

~~Disclosed is~~ A polyetherpolyol for use in production of polyurethane, ~~characterized in that~~ includes polyetherpolyol carbons ~~have~~ having stereoregularity of syndiotactic triad. Further, a method of preparing such polyetherpolyol is provided. ~~Therefore,~~ The polyurethane resulting from stereoregular polyetherpolyol is superior in physical properties to polyurethanes obtained by use of atactic polyetherpolyol.
